Dear Friends.

Modern times require from each and every a courage to define personal opinion as well as an attitude with regard to important social, religious, scientific, global issues. It is a privilege, yet, an obligation to verbalize self, personal opinion, and sensitivity ingrained within conscience. Every man has something to say, every man, woman haveee thr story to teell, yet, it is also a fundamental right to be heard, and sometimres to take a stand on behalf of those who can not and/or are deprive of right to speak.

Human attitude is ftafually shaped, animated, molded since childhood. Human is, de facto, the „product" of times, society, and systems, which profoundly influence human judgment, sense of responsibility, opinions, and yet, an attitude.

Within permeating social reality, man is called to fulfill his/her best intentions, intellectual gifts, spiritual attitudes, and in many locations around the world, man is denied to be free, yet, man is suppressed, doscouraged, and persecuted to be self. In some instances, man has no right to be good, de facto, man is denied to be free, liberated from evident and/or hidden persecution.

Despite all the difficulties to express uniqueness, which dwells within every human being, we shall not forfeit our right to speakm even while facing retaliation, and yet, to be the best man can be unnder circumstances, even while facing abuse, unlawful imprisonment, violation of rights, dignity, even personal safety. Threats are common, too common as we learn every day from the media, threats come from within the abusive state (GovHitman syndrome), legalized corruption or crime organizations, influential groups sponsored, and bribed by monetary incentives, official programs, and yes, grants.

Aall too often, the man is the subject of discrimination, even brutality by the authority serving indiscriminatelly political thugs, who privatize politics, history, culture, and even the religion for expressing opinions, opposition, yet, the man is suppresssed, persecuted for the will to demand rights while challenging the status quo of corruption.

Yet, we have the choice, we can either actively participate within the ethical procession, demanding respect and l88berties, and prevention of corruption, violence or severe imposed restrictions with regard to liberties, freedoms, human rights, and yet, we can watch, become a „neutral" while the corruption participate in systemic degradation of the society. Choices, we make choices, proactively or not, yet, since the beginning of time, we are participating in a sequence of choices. In the eternal struggle between good and evil, between light and darkness, your voice counts. This sounds like a cliche, yet, is is a profound truth that define each man, woman, yet, the society as a whole.

This quest animate, indeed, interesting phenomenon, a phenomenon, which can be described as proactive participation, animation of the reality, yet, the reality reflects permeating sequence with regard to verbalized opinions as well as attitudes, and subsequently demands. We know very well, that majority of the people are good, yet, this very majority often choose a passive role in the social fabric, participation. In everyday life, we vote for something or not. We say "yes" or "no", even if we do not express our opinion, our vote is assigned to a certain cause, sometimes bad, unequal, especially when we do not project well defined opinion on the subject, de facto, our own opinion, and an attitude.

Today I wish to express some of my opinions, as the citizen of the world, USA and Poland, European Union. This is my vote, yet, my reality, inner reality, which I wish to share and project. Some of my opinions were already manifested in letters and comments, yet, here are few more issues I shall to prophecise.

Sincerely,
Marek "Mark" J. Wagner

I

Feeding the World

Human race, for the first time in history, achieved the ability of so-called overproduction. The human can produce nearly everything in abundance, yet, even in excessive quantities. The distribution of the earth's riches, and human capabilities is inadequate.

Many countries are able to accelerate the production of food to eradicate hunger, yet, countless people are still dying from malnutrition. For example, dry milk can be delivered to areas, where people, especially children are suffering, and even dying of hunger. Poland alone can deliver a substantial amount of dry milk to poor countries, yet, Polish agriculture is in a state of hibernation (in many instances a least).

Dry fruits and vegetables, dry milk and many non-perishable products can solve short and long term problems with regard to hunger around the world.

Safe Food and Drinking Water.

Excessive use of fertilizers is the cause of many diseases, such as cancer, diabetes or depression. Regulations, worldwide, is a must to prevent a human being from DNA alteration. Food, water is the most essential energy source, every man and woman, the entire natural world absorb daily. The quality of food is linked with the quality of life as well as the future of our species.

In addition water is treated with a substance such as pain relievers, psychotropic substance, yet, a variety of substances (nano-technology) in order to control society, suppress judgment and/or reproduction.

II

Imprisonment Reform

The Justice system, when it comes to imprisonment is a broken system. Human, who committed offense against man or a state shall be the subject of punishment, including resocialization, instead further criminalization is taking place. Statistics, as well as opinions from professional sources indicate, for decades, the people, who were the subject of imprisonment was not exposed to proper techniques and methods, which would mold the human character and response system in proper way. In many cases, people, who were imprisoned, return to their previous criminal activities, and in some cases, imprisonment caused further degradation of human dignity and a sense of responsibility.

Imprisonment system require revision and a new approach to dignify human being instead of degrading from the social fabric.

The imprisonment system in many countries, with some rare exceptions, became a business activity, profiting machine, while the degradation of men is anticipated to fulfill demand.

Stop death sentence, and penalty. Death sentence does not reflect modern moral standards. In many cases, innocent people were sentenced to death. This punishment is irreversible, and should not be implemented by the justice system.

III

Education

Every man shall have the right, and an equal opportunity to education. This is of paramount importance to understand ourselves through science, knowledge, including the spiritual fabric of existence. Education broadens the frame of awareness even choices, even liberties. The ability to read, write, and count is not enough, we need to educate a man in a meaningful way.

Education represents a unique path through which the human race can solve difficultly issues within and beyond, without it, our civilization will be crippled and unjust.

Educate, and be educated for life...

IV

Refugees and Immigration Issues

Millions of people are being displaced throughout the world. Entire families, clans, societies, ethnic groups, and nations are the subject of discrimination and abuse, expulsions, systemic crimes. Millions of people live in tents or temporary shelters. We can not ignore this issue in our social awareness, even if tormented communities dwell very far from our own reality.

Human shall not be deprived of dignity, roots, traditions, yet, human shall not be the subject of the systemic social, existential, ethnic threat. Refugees shall go back to their homes under the protection of the United Nations or military assistance. Refugee issue on a global scale is a disgrace, yet, shows a serious, de facto, sad criminal patterns, where countless people are denied rights and liberties.

Please protect men from profiling, and abuse.

V

The Climate. Save the World.
Clean Water Air and Earth.

Climate patterns show extreme changes in nearly every corner of the world. Weather phenomenons, warming effect, glaciers, which disappear in front of our eyes. Signs are evident, yet, initiatives to stop this process is more cosmetic than meaningful.

Polluters, irresponsible fishing practices, Co2, mercury in oceans and seas, droughts, the problem with drinking water in areas where water was once abundant, tens of millions of flights around the world cause serious damage with regard to air/oxygen, yet, deforestation, plastics saturate natural habitat. The entire world must take appropriate steps, programs, based on the science of survival, not politics of short-term advantages.

Climate changes, warming effects, require bold, global effort to save our children from tragedy. Every country in the world shall be required to do its part. Great polluters and the smaller ones are all considered significant in terms of global threat. This is a call for the entire human society.

Cosmetic policies, or written on parchment „programs", and initiatives will not do any good with regard to anticipated , meaningfull chaanges .

The whole world must gather, and sign the Global Agreement of Conscience with regard to mutual responsibility, economic, ecological programsm and yet, the future of the our civilization.

Natural habitat is animatinng biological life, human life
(it is not a cliche but ingrained truth within our DNA, yet, DNA of our civilization).

Save the world, it's about time….

Please save the world, save the human race.

VI

The World Free of Wars

War(s) in human vocabulary became an integral part with regard to the social landscape. From the beginning of time, until now, not much changed, besides the scope of destruction. At the present time, after bloody revolutions, global, and regional wars, ethnic cleansings, ethnic clashes, our civilization developed a new approach, localized wars, deadly, bloody conflicts: **Regional Wars Doctrine**.

Let's demand, and animate the peace in human hearts and minds, and then, everybody will feel safe and not threatened in his dwelling as well as the society.

Please stop ethnic wars, economic wars, racial conflicts, religious conflicts. Please stop the violence. Every child, man, and woman deserves to live in a safe environment. Peace is the human right.

Due to the sophisticated technologies, regional conflict can turn into the global war.

VII

Access to Healthcare vs Quality of Life

One of the most important qualities, in terms of human existence, is man's well being, health. Man shall have access to healthcare. Yet, to this day, children are dying of easily cured infections, elders are suffering from pain, which can be cured. Healthcare is the essential, fundamental responsibility of the state, local as well as global governments.

Healthcare is synonymous with the prevention, proper diagnosis, cure, and again prevention. A proper healthcare education from an early age shall solve a variety of problems when it comes to the quality of life.

VIII

The Minimum Wage
Social Minimum Guaranteed by the State

Human society around the world is severely divided when it comes to the distribution of wealth. While respecting all levels of wealth within society, we shall establish a minimum for every woman, man, and the child, a minimum, which will maintain basic human essentials, such as healthcare, education, safe annd comfortable dwelling, hea;thy food, entertainment, vacation, leisure, and most of all, a personal growth.

Established minimum for every man and woman as well as a child would enrich human society spiritually and economically, it would enrich also wealthy.

Minimum social standard is synonymous with a peaceful, balanced and harmonious society.

IX
Employment

Employment shall be maintained, and guaranteed for every person, who lives on Earth. Unemployment creates divisions within society within every scale, profoud trauma, regional and global, aggression, crimes,. The society, and unemployment and an anarchy.

Employment provides needed goods, yet, employment is molding man as an active part of the society, and his, her contribution of collective efforts toward the future.

Moral, social consequences of unemployment are impossible to ignore, yet, oscillate within anarchy, criminalization. Steady, and fulfilling employment is the objective of a progressive society, a society of welfare and happiness.

X

Eradicating Homelessness

Homelessness is the result, and the byproduct of the social system, and human interactions. Rarely man chooses to become homeless. Man is either forced toward homelessness by the society, discriminated within society abused or too weak to withstand emotional attacks on her, him or a family. Homelessnes is a sophisticatedd program, in some instancees, system that deprives man of dignity, self preservation.

Homelessness undermine the ethical background of the society, including Christianity. There is no justification for the society to see a man sleeping under cardboards or under the bench in the park.

Caring society shall develop programs that would prevent homelessness. Some members of the society can not decide about their own lives, due to the fact of shattered moral foundation, addictions. In such cases, society shall step in with help and guidance, sometimes cure. Shelters for homeless people are often dirty, abusive, intimidating, ugly.

Man, who freezes to death reflects a disturbing statement. In some countries animals, dogs, cats are the subject of more protection against abuse than men are, yet, man, as well as lesser brothers, shall be protected from harm.

XI

Distribution of Wealth

Abundance is the word that precisely describes reality. Earth is enormously abundant, the human mind is potent, creative. At the present time, civilization is producing varieties of goods, and an extensive wealth, yet, distribution still requires careful examination. In some parts of the world, in Europe for example, countries, which have vast natural resources, and production abilities, the citizens are poor, when in other countries, which don't have natural wealth, and resources, the citizens live abundantly.

Distribution of wealth, represent a necessity for healthy social order, not to mention ethical or religious requirement. Distribution of wealth is of paramount importance for countries, which desire stability, and growth.

Unfortunately new forms of slavery, even feudal states under the shield of democracy, still dominate many poor societies, which otherwise would perform well, efficiently, according to moral, and economic standards. One of the countries I would like to mention is Poland, which is going through carefully designed states of crisis since 1772. Poland represents a classic example of economic abuse as well as a colonized society. The system is designed to proactively elevate crisis in order to get elected (opposition parties seek crisis as the propeller for their own career. Without a crisis opposition can not be elected. This is an ultimate corruption scheme and a threat in any socia scale.

XII

End Slavery

Slavery is still part of human global affairs. While in some parts of the world slavery is obvious, in other parts of the world, slavery is not as obvious, yet, people are severely violated in terms of freedom (example: a fair pay for the work). Often, members of the same society or a race discriminate its own citizens, for example, state-sponsored trafficking where GovHitman engages in a systemic trafficking.

Slavery among children is not uncommon, women, elders as well. Human trafficking falls into the category of slavery, yet, not as transparent.

While the most publicized slavery are Africans, now, for decades white race or Asians are equally or even more affected by slavery than Africans.

Slavery, to date, is not eradicated.

XIII

Stop Ivory Poaching
and
Ritual Killings of Animals

Ivory poaching is considered as cruel animal abuse, rightfully so.

With all due respect toward religious practices my hope, and intention is to eradicate ritual killings, with regard to animals. I hope, religious leaders will find a way to replace practice of suffering, brutality, with a new one, compatible with the divine scriptures. I respect every religion, and expression of faith, yet, ritual killings is in obvious contrast with my faith and understanding of righteousness.

In the Bible animals are being called “lesser brothers”. We know that animals are sophisticated and show evident qualities with regard to awareness, joy, animals also suffer, yet, animals feel and recognize the difference between safety, and danger. Please stop ritual killings and suffering of our “lesser brothers”.

XIV

Free Speech
Free Internet
Free Society

The Internet represents a global phenomenon, yet, democratization. Word is blending, man becomes more aware, and more educated, yet, human frame of awareness also expands. The Internet represents important human development toward a free society. Free Internet and free speech, we shall not give up our freedoms.

XV

Stop Weaponizing Nature

Nature became yet another tool of war in human arsenal of war. Extremely destructive and unpredictable. Please stop weaponizing nature, murdering people, destroying our planet. Please stop climatic wars.

XVI

Eradication of Homelessness in Parishes

Homelessness is troubling and emotionally, spiritually devastating, including for Christian men or women. Christian virtues, diligence, patience, kindness and humility, Christian virtues shall paint and chisel awareness, as well as an appropriate attitude deep into the human heart, and mind.

Worldwide, 100 million people are without a home (an estimate). In predominantly Christian countries homeless people are common. Homeless people create entire communities next to the population they live in, such as large metropolis. Tens of thousands of homeless live on the streets, dig in trash pits for food, beg for money, including children and teenagers. As of today, many countries do not disclose precise number of people without a home. This situation is unacceptable.

In order to address this troubling problem, including in Christian countries, which are in most cases resourceful and wealthy, some steps are essential to eradicate homelessness:

- precise census of homeless people by county, city, country, parish/religion (a necessary step toward eradication of homelessness)
- temporary work: for Christian and other cooperating organizations, parishes, parishioners
- adapting parish real estate (buildings), which are either too large or unused for the purpose of accommodating homeless Christians and everybody else without limitations
- stewardship: priests, nuns, monasteries, professionals,
- adapting vacant, empty buildings to accommodate the homeless,
- parish family program for homeless child and a teenager (either temporary or permanent),
- handicraft (all ages-paid): from simple to more complex,
- training for homeless,
- evaluation system for the people, who are unable to make decisions for themselves (addictions, illnesses, depression) and implementation of programs, which would allow navigating toward improvement (hospitalization, supervision, and custody in a safe environment where human dignity is not violated)
- educating and in some cases prosecuting people who purposely cause or stimulate homelessness,
- adopting recreational trailers to accommodate the homeless, at all times, yet, especially during the cold season.

Homelessness shall be eradicated unless we decide to live in moral twilight instead of receptive and tender, benevolent Christian society. Please support Total Eradication of Homelessness in Parishes and every community affected by injustice, discrimination, personal tragedy. God Bless….

P.S.
Many, if not most people are being forced into homelessness, that's a fact. People are being (purposely!) navigated toward degradation of personal dignity. I can prove it beyond any doubt (it is an illegal program).

XVII

Human
Good vs Evil

Do not accept the notion stating that an integral part of human is the so-called dark side. It is a matter of choice and a state of awareness as well as a frame of awareness, yet, social interactions. Human willfully chooses certain attitude or posture. If society will accept and train the notion about the evil within man, a man will eventually become what he accepts as a fact. Human is good and shall be reinforced emotionally and spiritually as good, every day, all his, her life, because goodness and righteousness are, de facto, a reflection of the original design, Intelligent Design.

XVIII

Ritual Slaughter
(Rytualny Ubój)

Please stop Ritual Slaughter

Ritual slaughter, besides unquestionable suffering of animals, violate emotionally human as well. People who participate in Ritual Slaughter experience emotional trauma, experience negative psychological changes, including alcoholism, aggression, depression. Many workers request transfer to different departments. Yelling, screaming, noises are impossible to endure. Workers complain and feel guilt, including extended trauma while participating in Ritual killings.

Please stop Ritual Slaughter. Protect Humans. Protect Animals from cruelty… .

XIX

World's Ethnic Heritage

World's ethnic and racial heritage is unique in every country as well as the continent. Scientific and global social programs shall preserve ethnic, national heritage, languages, dialects, customs, dances, national outfits, history, religions. The entire world is rich in diversity and diversity manifests and illustrates the fertility of human existence, yet, potential.

Unique Ethnic Heritage is Embedded within Intelligent Design,
as well as natural wealth, the richness of the natural world.

XX

Hierarchy vs Modern Society

The universe is based on permeating hierarchy, a simple, yet, brilliant system. Hierarchy is present in the physical as well as the spiritual world. Hierarchy based on the purpose of mutual respect provides a foundation on which physical, the natural world can thrive, de facto, exist.

Today the world is facing worldwide obstacles, yet, a regress, in terms of social relations, where hierarchy is not only questioned but often rejected. Society needs a healthy hierarchical system, a system of trust and respect the dignity of every man, woman, and child. While teaching children respect toward parents, elders, teachers, authority, another human being, race, ethnicity, nationality, individuality, as well as sense of accountability, human society will be able to relate, project a hierarchy in everyday life and apply universal hierarchical blueprint of mutual respect.

Reinforcement of mutual respect through a healthy sense of hierarchical order is a proven model toward peace and progress in the world. Any effort, which undermines hierarchy is the beginning of anarchy, injustice, and violence, either emotional or physical. Parents, please teach children respect, and you will create a hierarchical system based on each man's dignity as well as respect, peace, sense of security and subsequently social harmony in the world.

Mutual respect is synonymous with hierarchy in social relations.

XXI

World's Cultural Treasures

Every culture, ethnicity develops its own unique projected illustration of perception, through beliefs, customs, art, technology, exploration, religion. In the Third Millennium, all that has been done since ancient times, de facto, represents certain culture or period in a Universal World's Cultural Wealth.

For example, stolen treasures of ancient Iraq shall be returned to Iraq immediately. Countless, one of a kind treasures are missing or are stolen. Iraq's treasures belong to the people of Iraq, yet, a global Heritage and shall be protected from destruction, plunder.

Cultural Treasures are animated and projected within diversity, both cultural heritage and diversity reflect the Intelligent Design paradigm.

Please Protect the Heritage, Cultural Treasures.

XXII

Technology vs Man

Technology, scientific progress shall not undermine or become a threat toward a human being, human dignity. Weapons, psychology, media is reaching society globally. Technology, which is applied against another human being, undermines the blueprint of progress and will lead progressively toward a global threat.

Technology shall not become a tool against humans.

Progressive robotization shall not undermine the social and global dignity of society, on any scale.

XXIII

Water Farming

Human civilization is increasingly depleted form from fresh, drinking water. Lakes, rivers, water reservoirs are drying up. Entire societies around the world suffer because water is scarce or insufficiently distributed or exploited beyond rational. These dangerous developments require careful and responsible planning, as well as the implementation of a new methods to preserve the most important ingredient of life, such as water.

Water Farming programs will bring man to the roots of awareness in terms of self-preservation.

Water Farming would include responsible preservation programs for the entire civilization through an understanding of climatic cycles, consumption, technological absorption, prevention of irresponsible waste of water. Water is and shall be the property of the entire human family.

XXIV

Subliminal Manipulations

Subliminal manipulations (via radio, TV, Internet, nanotechnology, radio frequencies, etc.) reflect a mutated form of enslavement of human beings. Free will is under a threat, and progressive mutilation. Anyone can be affected and turned into the biological machine (slave), without even knowing. Formidable threat to the entire civilization. Stop subliminal manipulations immediately.

XXV

On the Shoulders of Giants

At the beginning of time, Divinity, as well as exceptional men and women defined moral paths toward social progress and expansion of the frame of awareness in countless scrolls and books. Invite yourself for the journey within and beyond the senses. Paradise was invented a long time ago before man appeared on Earth. The Eartth is, de facto, a Paradase is a true sense.

For the time being, Universe is too heavy for a man to carry, let Giants carry the world. Rely on the teachings, bring words of wisdom to the attention of self and the society.

Participate and Be Aware

^

See, while you watch. Listen, while you hear. Sense, while you exist.

XXVI

Earth's Orbits and Space

A few decades ago, a man went to space, the society initiated exploration of the near Universe. Man came from stars and now man is returning to stars.

At the same time, space exploration is causing accumulation of so-called junk in an immediate space, Earth's orbits, which are a threat to an International Space Station, and the Earth dwellers. Space junk is a threat to human life in space, astronauts, as well as to the people on Earth as well as nature.

Responsible recycling program on Earth's immediate space, orbits, is now a necessity.

XXVII

Human Awareness vs Divinity

Rejecting Divine existence, Higher Intelligence illustrate the irrational expression of logic. Existence of information in the Universe, as well as sequential patterns including human DNA, the phenomenon of progression of patterns is proving, beyond any doubt, that Divinity is the reality. Yet, no one has more power to bring people to God or push away a man from Divinity, befriending or alienating man with God, than religions. Enormous influence, yet, enormous responsibility. All too often religious inequalities and abuse pushes away people of faith from the Divine Domain, an expression, awarenesss, beliefe that somethng is bigger then self.

XXVIII

The Science of Emotional Existence

Within each man is embedded, profoundly, essential emotional sphere, including love and compassion toward another man, yet, every human being ought to define its own posture, ethical spine through training of perception, spiritual journey, expansion of the frame of awareness toward self-perfection via learning and scientific studies. Emotional muscle can not be neglected, yet, trained not by a force or pressure but example and empathy in everyday life. Care about your morality like you would care for your garden.

XXIX

Textbook of Life

The textbook of life, perfection is within you. Mind, body, senses, spiritual science, nature, awareness, all of that is as far, yet, as close as yourself. From medicine, architecture, available materials, transportation, communication, all answers dwell within a human being. Do not look further, because the Universe and the future are already embedded in every man, woman, and the child (an ultimate knowledge & wisdom).

Human being with all question marks are the ultimate answer in every journey and exploration. An ultimate quest is the quest within.

XXX

Biological vs Synthetic

At the beginning of time, man is profoundly reinventing himself. It is a part of the equation. Scientific inventions often define civilization, yet, some inventions, as well as practical applications, pose a longterms obstacles vs shortterm advantages. Among inventions, which are potentially dangerous are synthetic materials, non-biodegradable. As I have mentioned in the past, nature, human beings, laws of the Universe, illustrate sensible and a logical textbook for man. In many applications synthetic materials became essential, yet, sooner or later science shall develop biological equivalents or efficient recycling and utilization programs (for example plastics, electrical cells and many more). Let's learn from the Divine nature and the Universe about efficiency as well as proficient, logical management of the world, our most precious treasure.

XXXI

Liberties vs Permanency of Power

Permanency of power can be achieved by bridging the theoretical as well as a practical science of welfare with regard to all people, based on the dignity of every human being. Accountability, and ethical eloquency shall be written within human conscience, yet, a promotion letter.

Liberties reflect, de facto, permanency of power.
